

# CLEAR® LOCALIZE

## Change the way you manage your Localization Process with CLEAR® Localize

Walk away from the cumbersome processes of managing multiple projects, spreadsheets, vendors, languages, and services, across time zones and logging into multiple vendor-specific systems. Take a step towards CLEAR®.

CLEAR® Localize, a cloud-based process automation platform, simplifies your Localization process to make it easy and enjoyable!

Streamline your communication with multiple vendors; enjoy complete transparency into progress updates and estimated delivery dates. No more time wasted on emails and calls while missing important deadlines. Always stay up to speed.

### Here's what CLEAR® Localize can do for you

- Simplify the Localization process to manage multiple orders, languages, and media for seamless operations
- Enhance efficiency and productivity with fully automated media logistics
- Ensure visibility and transparency into project progress and delivery date

### Localization orchestration with CLEAR® Localize

- Ready to go platform which brings together the entire localization pipeline on cloud by integrating suppliers, clients, and service providers on AWS
- Automated and secure interface connecting localization vendors and freelancers globally to manage multiple orders, languages, and media while ensuring content is secured before transfer to prevent leaks
- Single pane of glass with instant/full visibility of localization pipeline with real time tracking and monitoring
- Review and Collaboration with purpose-built cloud subtitle QC review tool

### Business Benefits

- Time and cost savings through easier administration tasks
- Enhanced productivity and efficiency through fully automated Media Logistics
- Achievement of high quality with built-in tools for collaborative reviews
